Attorney Docket No. 1762-010921

**AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims**

1. (Currently Amended) A method for conducting, augmenting or any combination thereof at least one convention, by facilitating the exchange between at least one meeting planner client and at least one attendee client, the method wherein this exchange is accomplished with web browser computers at the client, with program instructions on a central website server comprising the steps of:
  - a. receiving, from the at least one meeting planner client, and electronically storing in convention databases at a central website server, program instruction control parameters and convention content information for a plurality of conventions;
  - b. receiving at the central website server from the at least one attendee client a selection for convention content information of one convention from the plurality of conventions;
  - c. processing the selection at the central website server by computer software using the program instructions configured to create content for use in a virtual convention venue, a physical convention venue, a convention activity or any combination thereof and control parameters; and
  - d. releasing from the central website server to the at least one attendee client the selected convention content information.

**Response Under 37 CFR 1.116**

**Expedited Procedure**

Paper Dated: November 29, 2006

In Reply to USPTO Correspondence of August 30, 2006

Attorney Docket No. 1762-010921

2. (Original) The method according to claim 1 wherein the at least one meeting planner client is a plurality of meeting planner clients.

3. (Original) The method according to claim 1 wherein the at least one attendee client is a plurality of attendee clients.

4. (Original) The method according to claim 1 wherein the convention content information is cyber-based.

5. (Original) The method according to claim 1 wherein the convention content information is one of cyber-based or venue-based.

6. (Original) The method according to claim 1 further comprising the step of storing in a relational database cross-referencing fields from the meeting planner client to allow for the holding of an unlimited number of conventions.

7. (Previously Presented) The method according to claim 1 further comprising, prior to step b), the steps of receiving at the central website server a search request from the attendee client for certain convention content information and releasing to the attendee client information satisfying the search request.

**Response Under 37 CFR 1.116**
